BASIC to TRANSLATIONAL MEDICINE 2016: **focus on CANCER**

ABOUT THE CONFERENCE

Objective of this meeting is to share the foremost updated knowledge on the pathogenetic mechanisms and on the diagnostic and therapeutic options in Cancer.

We will gather academicians and young inspired scientists from all around the world involved in researches at the cutting edge in the study of the biology and clinics of Cancer.

We gladly welcome attendees interested in learning on the recent discoveries in the cancer field.

Conference Highlights

Pathogenetic mechanisms (cancer stem cells, epigenetics, oncogenes, oncosuppressors, DNA repair, inflammation)

Nutrition, obesity and Cancer

Novel strategies for diagnosis and therapy

Natural products to prevent and to fight cancer

Session tracks on Skin cancer, brain cancer, mesothelioma, hemato-oncology, breast cancer, ovary cancer, prostate cancer, colon cancer, cholangiocarcinoma.

Learning Objectives

Review the most up-to-date knowledge on the molecular biology and metabolism of cancer cells

Examine the role of genetics and of epigenetics in carcinogenesis

Explore the novel strategies to prevent and to fight cancer

Study the new techniques for cancer detection and therapy

Focus on the genotoxic and non-genotoxic mechanisms of cancer development and progression
